

Sustainability at The Perse

THE PERSE SCHOOL CAMBRIDGE

Guiding our approach to education and operations at The Perse are our **values**, which include caring for one another and our **environment**.

The Green Team Leads by Example

Our Green Team share ideas and work together to enhance the school environment.

Eco-Schools Green Flag

The Perse proudly earned the Eco-Schools Green Flag Award with **Distinction**, at both the Upper School and the Prep, thanks to the hard work of the **Green Team (Upper) and the Eco Team (Prep).**

Eco-entrepreneurs visit The Perse to speak to students

Robert Fryers (OP 2005) returned to The Perse to give an insightful 42 Lecture on his revolutionary pest control system.

Spotta, launched in 2017, uses AI to dramatically reduce the use of pesticides and the level of CO_2 produced.

The ‘42 lectures’ series features a range of topics from guest speakers each term.

SOLAR PANELS

We seek to **improve existing buildings** as well as ensuring new buildings are sustainable.

A new solar farm has been installed on the roof of the **science block**.

Singaporean students teamed up with Perse pupils in **eco-design challenge**

School of Science and Technology Singapore collaborated with the Upper in a product design challenge combining originality, style, functionality and sustainability.

Thought-provoking Perse Pelican Show

Year 1 Perse Pelican pupils staged a marvellous **musical performance** of *Eddie the Penguin Saves the World*. The hero of the tale went on a global mission with his family to highlight the importance of **protecting the environment**.

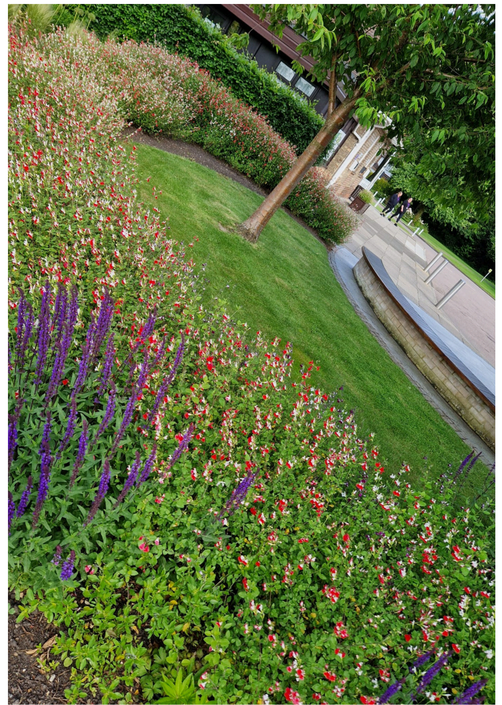

Eco-entrepreneurs visit The Perse to speak to students

Paul Naylor (OP 1979) gave a talk to students on his underwater photography, used to highlight the importance of looking after the **marine environment** and raise awareness of the issues facing coastal creatures.

Enhancing wildlife on site

The Grounds & Gardens Team maintains extensive flower beds and **wild no-mow areas** on the school site to promote **biodiversity**.

Sustainable Buildings

New building projects in the School are undertaken with energy efficiency and environmental impact being included as top priorities. The new sports centre has achieved a BREEAM ‘excellent’ accreditation, including achieving maximum credits for water efficiency.
